📍 Charlotte, US 28205

SKILLS

Backend & APIs

Node.js, TypeScript, C#, Python
GraphQL, REST, RPC

Frontend

React, Vue, HTML, CSS, TailwindCSS,
Storybook, PrimeVue, Chakra UI, AG Grid,
Telereik

Databases

MongoDB, SQL, Cosmos DB

DevOps & Cloud

Docker, CI/CD Pipelines, Azure, AWS

Testing & Tooling

Jest, Vitest, Cypress, Postman, Git, GitHub
Actions

Agile & Delivery

Agile/Scrum, Jira

EDUCATION

Westmoreland County Community College, United States

Youngwood, PA • 06/2020

Associate of Science: Computer Science

- Dean's List

PROFESSIONAL SUMMARY

Results-driven Senior React Developer with over 8 years of experience in designing and developing scalable, enterprise-grade applications. Deep expertise in React, TypeScript, and Node.js. Consistently delivering complex, data-driven frontends within regulated financial environments. Proven ability to build robust APIs using Python/Django and C#/ASP.NET in Azure settings. Adept at collaborating with cross-functional Agile teams to ensure seamless integration from API design to polished UI delivery.

ACCOMPLISHMENTS

- Promoted to Senior Developer at Eastdil after owning & delivering a complex feature under tight deadlines.
- Built AG Grid-powered analytics dashboards at Omega Holdings with real-time data feeds, advanced filtering, and sorting across large DeFi datasets.
- Developed Azure-integrated frontends at Eastdil leveraging Azure Functions, Azure AD (auth/SSO), DevOps pipelines, and Blob Storage.
- Built internal Node.js automation tooling that saved over \$60K annually & became a company-wide standard solution.

WORK HISTORY

Eastdil Secured - Software Developer

Charlotte, NC (hybrid) • 10/2021 - 02/2026

- Built and maintained internal micro-frontend apps using TypeScript, React, and GraphQL in an Azure environment.
- Leveraged Jest and React Testing Library for unit test coverage and Mock Service Worker for APIs.
- Developed a reusable component library with Tailwind and Storybook, collaborated closely with UI/UX teams using Figma.
- Developed GraphQL API endpoints in C# .NET working with Blob Storage, Cosmos and SQL to support application features.
- Developed a client-facing Blazor-based WASM application.

Omega Holdings Limited - Front End Developer

Remote • 08/2024 - 05/2025

- Sole Frontend Developer responsible for creating & deploying a full DeFi web app and landing page site.
- Implemented complete CRUD functionality to interface with internal servers, smart contracts, and databases.
- Leveraged AG Grid and a RPC client to provide real-time data and analytics.
- Collaborated with our Smart Contract, Backend and Bitcoin developers to develop a proprietary blockchain protocol.

V3 Technologies - Frontend Developer (part-time)

Charlotte, NC (remote) • 07/2024 - 12/2024

- Supported a healthcare provider project using TypeScript with Vue 3, Apollo GraphQL, Tailwind, and PrimeVue.
- Worked closely with backend engineers to deliver full CRUD functionality, improving user interaction and data management.

Xylem, Inc. - Software Developer

Norfolk, VA • 09/2019 - 10/2021

- Served as the sole software developer, leading full-stack development and automation initiatives leveraging React, Python and Node.js.
- Built an automation server that streamlined operations and saved \$60,000+ annually.
- Designed and deployed services on AWS and on-prem environments (XCP-NG).
- Created a dynamic QR-ID system and internal tools for employee and asset management.
